- CSS
- Javascript

Frameworks

- React.js
- JQuery

Software

- Figma
- Adobe CC
- WordPress
- WebFlow

CAREER OBJECTIVE

I am seeking Web Development roles to extend my skills and create engaging and interactive web-based experiences. I am a logical and enthusiastic person and I pride myself on being a super-fast learner. I am detail-oriented in both a coding and visual sense, and have a keen interest in user experience which I keep front of mind when developing products. I love tackling problems in a logical yet creative way, weighing all the options and coming up with the best possible solutions. Plus, I'm a people person with awesome communication skills, making me a great mediator and group collaborator. I can't wait to put all these skills to use creating amazing user experiences and working with a fun, dynamic team!

EMPLOYMENT HISTORY

June 2021 - Jan 2022

STORE MANAGER

KILT Clothing LTD. - Wellington

I managed a team of six people, created monthly rosters, wrote end of month and performance reports, and analysed KPIs and sales targets. My role also involved working closely with customers and providing excellent service and interactions with clients.

2015 - 2016

RESOURCE DEVELOPER / DESIGNER

NZCER - Wellington

My role was to create hundreds of digital assets and take photographs for web use. I worked alongside a team to create learning resources for school children. As a part of the team I helped create a database of resources to be used online for tests created by NZCER.

RECENT PROJECTS

Jan 2023

GIG FORT APPLICATION

UX/UI Designer

- Conducted UX process to identify pain points of existing gig finding tools, created personas and took data from the survey to inform design choices
- Produced wireframes and low and high-fidelity prototypes in Figma
- User tested prototypes and made design modifications based on feedback
- Advised developer on UX processes and guided project toward evidence-based approaches

Dec 2022 - Feb 2023

WACKY WEKA WEBSITE

Designer / Developer

- Researched users needs, created diagrams and user flows and produced surveys to optimise the website for user experience
- Designed and created lo-fi and hi-fi prototypes in Figma, user tested the mockups
- Built a full stack website for Wacky Weka Nurseries using React for a fully custom design and Wordpress as the backend to allow the client to be able to edit and add to the site's content.
